1. Phase charging: Single-phase connection - chargers can deliver a maximum power of 3.7kW or 7.4kW, depending on the RCD (16 or 32 Ampere).
 2. Local control (Bluetooth and local OCPP) Users will be able to control their chargers locally without relying on our cloud services or internet connection.
 3. Easee Plus: Pay subscription for the Easee App with enhanced features.
 4. Easee Ready: With Easee Ready you can prepare a future charging point at low cost and set it up any time without your electrician.
 5. MID: High-precision certified measurement for consumption-based billing, covering the charging needs in most EU markets.
