

Example diagram of simplified mounting position of modules LR7-60XXX of the European

- This diagram is only intended to guide the static load that the module can withstand, in accordance with IEC61215-2:2016 Static mechanical load test items, when using the clamp mounting method on modules LR7-60XXX, with the clamps fixed in different areas of the module frame.
- This diagram is only applicable to mounting systems in which the mounting rails cross the module frame.
- All other installation requirements must comply with the Mechanical Installation section described in the LONGi Installation Manual.
- This version is exclusively available for Distribution Market in Europe DG.
- LONGi reserves the right of final interpretation.
